

# Weather Sealing Solutions

## Simple Solution™ Corner Pad & Endura Weatherstrip

Air pressure increases on the exterior side of a door system causing water to infiltrate the interior of homes that are not properly protected.

The Simple Solution™ is a compression corner seal with a patented design to seal the door's weatherstripping preventing water from percolating up and over the threshold.

Proper weatherstrip seals the top and sides of exterior doors with the frame, eliminating air and water infiltration.

And now it's easier than ever to protect both the weatherstrip and Simple Solution™ pad from painting mishaps with Endura's innovative Protective Paint Film.

Simple Solution Compression  
Corner Seal U.S. patent: 6,219,971

# WEATHER SEALING SOLUTIONS

**Raised corner pad fin** tucked behind the weatherstrip blocks water from traveling up the interior channel of the weatherstrip.

**Proper weatherstrip** provides superior compression when door is securely closed to prevent water and air intrusion.

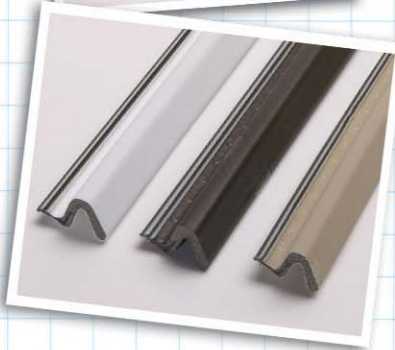

**Contact with the sill cap** ensures proper performance.

**Appropriate weatherstrip positioning** is crucial to avoid crimping or pinching. Inadequate weatherstrip at the sill surface will not provide a sufficient barrier to air driven water.

## SIMPLE SOLUTION™ COMPRESSION CORNER SEAL

Innovative design. Air pressure increases on the exterior side of a door system causing water to flow up the interior column of the weatherstrip. The Simple Solution™ blocks water under these conditions and the result is improved performance in a door system that will not leak.

## ENDURA WEATHERSTRIP

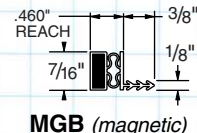

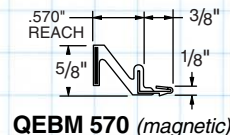

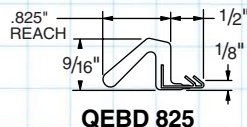

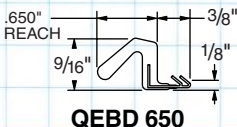

Resilience and durability. Endura weatherstrip creates consistent compression every time, providing a long-lasting seal and protection against air and water infiltration. Choose from a variety of styles including QEBD 650 regular, QEBD 825 long reach as well as magnetic weatherstrip options.

## PROTECTIVE PAINT FILM

Removing and replacing weatherstrip and corner pads during painting often results in damaged weatherstrip and improperly applied or lost corner pads. Endura provides a thin plastic film covering to weatherstrip and Simple Solution™ corner pads allowing these components to be left in place during painting of exterior frames and doors. Simply remove the film when painting is complete.

*(Available Spring 2006 for QEBD 650 bronze and QEBD 825 bronze & white. Call Endura for available lengths. Available for Simple Solution™ corner pads in all colors and quantities of 500 and 2,000.)*

## WEATHERSTRIP OPTIONS

Endura weatherstrip and Simple Solution™ corner pads are available in white, tan and bronze.
