

# Z-Full Narrow (FN) Sill

Performance Standard 

Z-FN Full Narrow Substrate

- 1. Composite Substrate**  
No more stuck doors or drafts because the Z-Series Full Narrow (FN) substrate material is a waterproof composite that won't rack, warp or rot, ever.
- 2. Composite Cap and Nosing**  
Extruded cap and nosing finishes look great and resist wear and discoloration. The synthetic material used in the cap and nosing prevent warping, rotting and wear.
- 3. Sealed Adjustment Screws**  
Patented sealing plugs hide unsightly screws and keep water and dirt away from the adjustment mechanism, maintaining adjustability of the sill cap over time.
- 4. Narrow Cap**  
Because of the narrow threshold cap, the drip edge on the door bottom deflects water a full 1/4" in front of the cap, protecting against air and water infiltration.
- 5. High Dam, Integrated Seal**  
A dual durometer cap seal overlaps the high dam. Both combine to provide a barrier to air and moisture even in the most extreme weather conditions.
