

Z-Plus Full Wide Substrate

Composite Substrate

No more stuck doors or drafts because the Z-Plus full wide substrate material is a waterproof composite that won't rack, warp or rot, ever.

Composite Cap and Nosing

Extruded cap and nosing finishes look great and resist wear and discoloration. The synthetic material used in the cap and nosing prevent warping, rotting and wear.

Sealed Adjustment Screws

Patented sealing plugs hide unsightly screws and keep water and dirt away from the adjustment mechanism, maintaining adjustability of the sill cap over time.

Narrow Cap

Because of the narrow threshold cap, the drip edge on the door bottom deflects water a full 1/4" in front of the cap, protecting against air and water infiltration.

High Dam, Integrated Seal

A dual durometer cap seal overlaps the high dam. Both combine to provide a barrier to air and moisture even in the most extreme weather conditions.

Why buy a Z-Plus Sill?
