### **ENHANCED ALUMINUM ENTRY SILLS – A COST- EFFECTIVE SOLUTION FROM THE “NO CALL BACKS” INDUSTRY LEADER, ENDURA PRODUCTS, INC.**

GREENSBORO, NC – May 26, 2004 — As builders continue to face new challenges unique to each market, Endura Products, Inc. responds with superior products that eliminate call backs. At the PCBC show this June, Endura introduces enhancements to its family of aluminum entry door sills — a new 3-9/16" all aluminum adjustable inswing sill size, as well as a redesigned 4-9/16" all aluminum adjustable inswing sill.

These enhanced sills exhibit a new performance feature, an addition to the family, and new flexibility that hadn't been addressed prior to this release in the classic aluminum design. The new performance feature is actually the patented overlapping cap found on the Z-Series™ synthetic sills. The overlapping cap increases the performance of the sill by incorporating the high dam and a dual seal to prevent water infiltration. The addition to the All Aluminum Adjustable sills is a 3 9/16" sill width with tile back extender. The redesigned 4 9/16" aluminum sill is now available in a high or low profile dam and easily converts from inswing to 5 5/8" outswing while still maintaining sill extending capabilities. The tile back extender adaptability on both the new and revised sills, ensures that flooring doesn't come up underneath the entry way, there is no space to fill between where the tiles end and the entryway begins, and even better there is no additional work required, the tile back extender sits flush up to the tiles leaving a seamless finish.

Endura's entire family of aluminum sills is offered in mill, bronze or brass finishes, and are a cost effective option available to accommodate most single, French, hinged patio and sidelite systems.

These along with eight other innovative products will be displayed at Endura's booth #5425 at the Pacific Coast Builders' Conference (PCBC) in San Francisco, June 15-18, 2004.

#### **About Endura Products, Inc.**

Endura Products, Inc. manufactures entry door component systems that improve door construction, door installation and long-term performance in the home. Endura components improve functionality, maximize the seal between the door and the opening, and reduce air and water infiltration. For more information call (800) 334-2006 or visit [www.enduraproducts.com](http://www.enduraproducts.com).
