IT'S HOW DOORS WORK.™**

## **ENDURA PRODUCTS APPROVED BY ENERGY STAR'S HOME SEALING PROGRAM**

August 2005

Colfax, NC – Endura Products, Inc. is proud to announce that it has been approved by Energy Star's Home Sealing Program. Launched in 1992, the Energy Star program is sponsored by the Environmental Protection Agency (EPA) to help businesses and individuals protect the environment through superior energy efficiency. The Home Sealing effort was recently developed to specifically focus on the energy-saving implications of reduced air infiltration into the home.

The goal of Endura Products' door components is to create a better door system by generating an impenetrable seal. While being well known for tested products that reduce damages associated with water infiltration, our components also serve as a barrier to exterior air. This reduced air infiltration allows for easily maintainable room temperatures, and reduces the amount of energy needed to power heating and cooling systems.

The Home Sealing Division recognizes companies that produce products that aid in sealing a home's envelope. From our reliable sills, sealing door bottoms, strong astragals, and sturdy frame components, Energy Star's Home Sealing Program agrees that Endura Products has made energy efficiency simple and easy for the homeowner.

### **About Endura Products, Inc.**

Endura Products, Inc. manufactures entry door component systems that improve door construction, door installation and long-term performance in the home. Endura components improve functionality, maximize the seal between the door and the opening, and reduce water and air infiltration.
