FOR IMMEDIATE RELEASE
IT'S HOW DOORS WORK.™

ENDURA PRODUCTS DISPLAYS NEW PRODUCTS

GREENSBORO, NC – May 2005 - Endura Products will be participating in the Pacific Coast Builder's Conference in San Francisco, CA again this year. At PCBC booth #1333, Endura will illustrate how "It's Not a Door Without Endura" proves true in every real-world situation by showcasing our new innovative door components for entry door systems.

In addition, the company is also showcasing the **SureSill(TM) Sill Pan**, which features a sloped channel plate to drain away water from beneath the sill. Another feature of the sill pan is that the channel plate can be cut to variable lengths and interlocking end caps can easily be applied on the jobsite.

Force 5(TM) Door Systems from Endura combine the strengths of its top performing products. **Z-Series** no-rot all composite sills are impervious to water, eliminating moisture damage beneath the sill. Continuous sills and headers add structural integrity to the door unit, eliminating racking and alignment problems. High performance weather seals including Force 5 Weatherstrip, leading edge door bottoms, and Simple Solution(TM) Corner Pads are uniquely designed to maximize the seal between the door, frame and sill.

Finally, the Ultimate Astragal and Ultimate Astragal Lite have a flush bolt with an integral boot that forms a patented 3-point seal, solving the problems of air and water infiltration so common with French doors. A new addition to our astragal family is our stainable **Wood Clad Ultimate Astragal**, available in oak, mahogany, pine, and Douglas Fir, suitable for wood or stainable fiberglass doors. The Force 5 Lifetime Warranty that accompanies this system allows builders to install a unit they can stand behind.

About Endura Products, Inc.

Endura Products, Inc. manufactures entry door component systems that improve door construction, door installation and long-term performance in the home. Endura components improve functionality, maximize the seal between the door and the opening, and reduce air.
