ENDURA TO SPOTLIGHT NEWLY ACQUIRED FRAMESAVER AT PCBC 2006

GREENSBORO, NC – April 2006 – Endura Products will be participating in the Pacific Coast Builder's Conference (PCBC) in San Francisco on June 21-23. At booth #0841, Endura will demonstrate its commitment to delivering innovative solutions and products for exterior door systems. New from Endura this year are FrameSaver® exterior door frames, Film-Wrapped Weatherstrip & Simple Solution™ Corner Pads, and new versions of our Ultimate Astragal product for W&F and Hoppe three point locking systems.

With the recent acquisition of FrameSaver®, Endura now offers a rot-resistant, moisture-proof wood door frame that eliminates callbacks. The FrameSaver® technology features wood door frames fingerjointed at the bottom with a composite material made from a combination of recycled sawdust and virgin plastics. It sands and finishes just like wood, yet keeps moisture from wicking up the frame. Featuring a lifetime rot-proof and insect-proof guarantee, FrameSaver® is available in entry, patio and garage door frames.

In addition to FrameSaver®, Endura will be showcasing the innovative Film-Wrapped Weatherstrip and Film-Wrapped Simple Solution™ Corner Pads. Removing and replacing weatherstrip and corner pads during painting often results in gaps, damaged weatherstrip and improperly applied or lost corner pads. Endura now provides a protective plastic film covering to weatherstrip and Simple Solution™ corner pads, which allow these components to be left in place during painting of exterior frames and doors. Simply remove the film when painting is complete. No more misaligned weatherstrip. No more misplaced corner pads.

Also available from Endura are new additions to our line of patented Ultimate Astragals that create a unique seal, solving the problems of air and water infiltration so common with French doors. Versions of the Ultimate Astragal for three point locking systems give the security that builders and homeowners look for with the performance unmatched by other astragal products.

Endura will be showcasing these items and many other rot-proof solutions, including the all composite Z-Series family of sills, and the SureSill™ Sloped Sill Pan that features a sloped channel plate to drain water away from beneath the sill.

Visit Endura's booth #0841 to see all of these products and to learn how to get a Force 5 warrantied exterior door system backed by Endura. It'll be easy to see why "It's Not a Door Without Endura."

About Endura Products, Inc.

Endura Products, Inc. manufactures entry door component systems that improve door construction, door installation and long-term performance in the home. Endura components improve functionality, maximize the seal between the door and the opening, and reduce air and water infiltration.
