Francis-Schulze Chooses FrameSaver

FrameSaver eliminates callbacks and enhances door system quality

NACOGDOCHES, Texas – The Francis-Schulze Company, an Ohio-based supplier of wholesale building products, has chosen Nacogdoches, Texas-based FrameSaver to provide rot-resistant, composite door frames for use in their pre-hung steel and fiberglass door systems. The partnership began during the first quarter of 2005.

FrameSaver manufactures the only wood door frame that eliminates callbacks for the building and construction professional. Guaranteed.

"We chose FrameSaver because it provides our customers extreme quality. When included in our door systems, FrameSaver's quality, competitive price point and lifetime warranty make it a win/win situations for both our companies and our customers" said Ken Francis, chief executive officer of the Francis-Schulze Company.

FrameSaver's technologically patented composite door frames, which resist rot and water damage more successfully than any other door frame on the market today and eliminate callbacks, are now the company's number one selling products and continue to increase in demand year-over-year.

"We are extremely pleased with Francis-Schulze's decision to feature the FrameSaver® technology in their quality door systems," said Rick Hagel, chief executive officer of FrameSaver. "Being able to call such a respected and recognized company like Francis-Shulze a customer is a testament to the unique value we bring to the marketplace."

About FrameSaver®

Based in Nacogdoches, Texas, FrameSaver is the market leader in technology-based, moisture proof, wood frame solutions for the building and construction industries. Utilizing patented, rot-resistant ends, FrameSaver produces the only wood door frame that eliminates "callbacks" for the building and construction professional. Offering a lifetime guarantee, the FrameSaver line of products includes wood frames for doors and garages.
