

Wood Veneer Ultimate Astragal

Now Available with Clear Alder Finish

Product Summary

By combining the Ultimate Astragal's patented three-point sealing system with the aesthetic appeal of real wood, our customers will be able to match finishes on wood doors. This proven performer offers a 24" one-piece flush bolt and the patented three-point sealing technology. It also utilizes a locking mechanism to prevent bolt disengagement from the outside.

FAQs

- **What finishes are available?**
Finishes available: Fir, Mahogany, Pine, Oak, and NOW Clear Alder.
- **Can the astragal be converted?**
Inswing can be converted to Outswing.
- **Is the astragal reversible?**
Reversible versions available for the Ultimate Astragal only.
- **Can I use standard end trim caps?**
The large end trim caps are product specific to this astragal. Standard end trim caps are not compatible.
- **What is the veneer made of and can it be sanded?**
The veneer is REAL wood and the exterior portion must be appropriately finished prior to, or immediately after door unit installation. The surface can be lightly sanded, but care needs to be taken due to the veneer thickness.
