

The FrameSaver® Lifetime Warranty Nobody Can Match

At Endura Products, we stand behind the superior performance of our products. FrameSaver® has been designed and manufactured to withstand time and the elements with a lifetime warranty against rot or insect damage.

- Will not rot, decay or suffer fungal damage resulting from water absorption through the bottom of the frame.
- Warranty transferable to subsequent homeowners.
- Composite must be positioned at bottom of frame.
- Replaces door frame and includes labor, installation, freight and taxes.
- Requires proof of purchase and photo of defective products.

Patented FrameSaver® products are cost effective, hassle-free and last a lifetime.

Look For The FrameSaver® Brand

Our FrameSaver® brand is stamped right into the product. This ensures builders and homeowners have FrameSaver® protecting the bases of their homes. Proudly display that your home is protected by FrameSaver®.

Builders Demand FrameSaver®

Endura Products is committed to supporting builders with superior products.

“As a builder, I am very concerned about my long term referral stream from past customers. Whenever I find a new technique or product that will reduce callbacks and decrease the possibility that my customers will have long term maintenance issues, I’m excited. Framesaver by Endura is that kind of product! Better still, I can provide my customer with something that is demonstrably better, at a very modest cost.”

Keith Rogers
Keith Rogers Homes, Inc.

“As a builder, water damage and wood rot around doors is a real concern. Endura has eliminated those problems with their innovative Framesaver door frames. Now customer complaints or replacements are not an issue.”

Andy Spengler
Spengler Construction

As part of a growing commitment to sustainability, Endura Products offers Sustainable Forestry Initiative® (SFI) certified wood products part of our frame and trim components product lines. This is part of our continuing effort to promote corporate and social responsibility.

FrameSaver® Q&A

- 1. Can FrameSaver® be painted like regular jambs or does it require special paint or application?**
FrameSaver® jambs can be painted like regular jambs and have our 180 day primer applied.
- 2. Can Endura run widths other than what is listed in the catalog?**
Yes, our catalog only lists the most common jamb widths. Contact your Endura representative for more information.
- 3. Can Endura apply hinges to jambs?**
Yes. Contact your Endura representative for more information.
- 4. Can FrameSaver® be stained?**
Yes. FrameSaver® can be painted and stained just like wood.

FrameSaver®
ROT-PROOF FRAME. BACKED FOR LIFE.

FrameSaver® Door Frames
Rot Proof
(And A Warranty Nobody Can Beat)

No matter how well a home is built, over time water and insects will come in contact with exterior door frames. Builders demand products that will resist rot and reduce costly repairs, including door frames. Protecting the base of the exterior frame is the idea behind our patented FrameSaver® technology. Our revolutionary wood composite material is so resistant to rot and insect damage that we guarantee the frame for life with FrameSaver's transferable Lifetime Warranty. That's Performance Standard.

Why Buy a FrameSaver® Door Frame?

Why ask for FrameSaver® frames in your doors? FrameSaver® Door Frames from Endura are simply the best door frames on the market. They are so dependable that they come with a lifetime transferable warranty that nobody can match. Our patented composite bottom won't absorb water, warp, crack or rot and finishes and paints just like wood. FrameSaver's finger-jointed wood composite protects the base of the frame from moisture exposure, and thus prevents water from wicking into the wood. Rot never has a chance to begin. That's Performance Standard.

FrameSaver® Features

1. Field Proven: Over a decade of "non-rot" performance.

2. FrameSaver® Lifetime Warranty.

- Will not rot or decay.
- Fully transferable.

3. Easily identifiable FrameSaver® Brand stamped right onto the product.

- Ensures the quality.

4. Finishes and paints just like wood.

5. Patented composite bottom won't absorb water so it won't rot.

- Won't wick water or swell.
- Rot never begins.

6. The composite material is finger-jointed to wood for a perfect fit that maintains the structural integrity of the frame.

- Extremely strong and durable.

7. 180 Day Primer comes standard.

- 180 days of protection.
- Excellent coverage.

Frame Issues in the Real World

1. Wicking Water

Water wicks up through wood fibers in a natural action. Rot is a naturally occurring fungus that grows in moist conditions and feeds on wood fibers.

2. Swelling

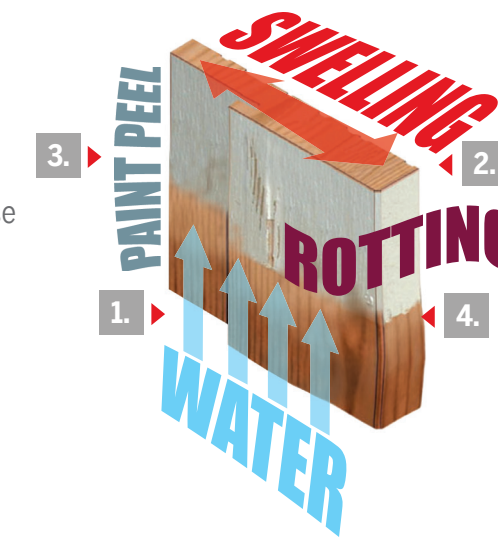

Shrinking and swelling occur as wood changes moisture content in response to daily and seasonal changes in the relative humidity of the atmosphere.

3. Paint Peel

Paint peels from frames because of moisture. Water standing on the sills eventually penetrates the paint film. When it later evaporates, the pressure from under the film causes peeling.

4. Frame Rot & Mold

Traditional door frames begin to rot within 3-6 months of field installation.

Frames

Available Sizes* (*Call for special sizes)

Available frames for door unit widths up to 8-7/8" and for sidelite & hinged patio applications.

Mulls

Standard Sizes

Fat Boy Sizes
