PANOLOCK[®]
MULTI-POINT LOCK

PanoLock[®] is the first and only multi-point lock that works with off-the-shelf hardware, bringing affordable security and performance to every entry and patio door.

Thumb press, lever or knob. PanoLock® works with every style of handle set and most lock brands. Matching hardware throughout the house is now a possibility. PanoLock is the multi-point lock you've been waiting for.

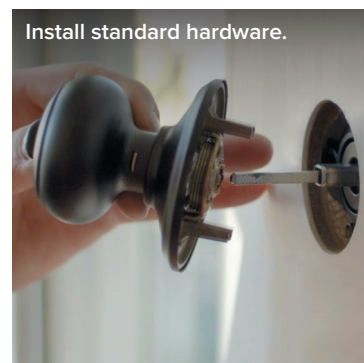

Works with standard hardware.

Choose your adapter.

Insert the adapter into PanoLock.

Install standard hardware.

Use of multi-point locks has been limited, primarily due to high cost, difficult installation and operation, and the limitations of dedicated handset hardware that are required for each manufacturer's lock offering.

PanoLock® works with off-the-shelf hardware. Schlage, Kwikset, Emtek, Gatehouse, Baldwin, Brinks, and Defiant.* And more.

PanoLock® integrates with almost every brand and type of handset through an innovative system of adapters.

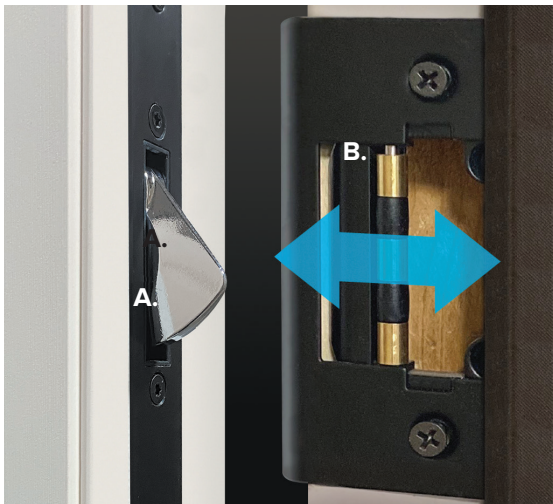

PanoLock adaptor.

* Please refer to our website to verify that your preferred locksets have been tested for compatibility with PanoLock.

Security. Performance. Standard.

A. Tapered bolt.
Unlike other locks that tend to catch, PanoLock's tapered bolts engage easily, even when the door is out of alignment.

B. Adjustable roller strike.
Rollers lower operating force and allow the tapered bolt to gently snug the door panel against the weatherstrip.

Easy to live with.

Most multi-point locks operate separately, and require extra steps to lock the door. PanoLock delivers a single operation system by integrating the handleset with the multi-point system. All three locking points activate with a simple turn of a key or thumbpress. PanoLock® is easy to live with, even after years of use.

Secure performance.

PanoLock delivers the strength of three locking points for uncompromised protection. No weak hooks or catches. Just tested, proven strength.

Tested and proven.

PanoLock has been extensively tested and proven to perform, even in severe conditions. During structural testing, PanoLock withstood winds up to 200 mph. Additional testing included:

- Operating Torque/Force Testing as low as 7 in/lbs with select handle sets
- Durability Cycle Testing Passed 100,000 cycles
- Air Infiltration and Exfiltration Testing to A2 requirements
- Water Infiltration and Exfiltration Testing DP60 with Z-Articulating Cap sill
- Impact/Forced Entry Resistance Testing to Grade 40 requirements

INNOVATION POWERED BY ENDURA.

Endura is built on innovation and a commitment to performance. Our products are problem solvers, born directly from insight we've learned from our customers about real-world challenges. We're always pushing ourselves to face an ever-present challenge: How can we make your door system work better?

Innovation protected under patents and patents pending in U.S. and Canada.
