Z-AC[®]
Z-ARTICULATING CAP SILL

Z-AC automatically adjusts – saving time, eliminating maintenance and service calls, and delivers constant protection against leaks, drafts and insects, even if conditions aren't perfect or change over time.

How much are you and your customers really spending on installing, adjusting, and servicing door units?

Your costs don't stop at the door.

Your customers want a sill that never has to be adjusted. They want a sill that performs when the opening isn't perfect. They want Z-AC.

Margins are rarely, if ever, perfect.

Job sites aren't always square, level & plumb.

Missing parts cause big problems.

When it comes to adjustments, everyone gets cold feet.

Z-AC works in the real world.

Tested and proven to outperform every other sill on the market, even in imperfect conditions, the next-generation Z-Articulating Cap Sill® reduces the time and expertise needed to install a door unit. Z-AC prevents performance issues that lead to door unit failure, and eliminates costly service calls. Stop settling for subpar door performance. Cut your costs and count your savings with Z-AC.

What does Z-AC do for you?

Who has time to adjust?

No adjustment needed. Ever. Z-AC's unique articulating cap (2), compensates independently, up or down, +/- 1/8" along the width of the opening to form a consistent seal with the Z-AC Door Bottom (1) and overcome variations in vertical margins.

Trouble in the strikezone?

"Perfect" strike margins of 1/8" rarely exist on installed door units. The Z-AC Z-End Base™ (gasket stiffener (3)) forms a high-performance seal on strike margins of up to 5/32" and continues to work even if margins reach 3/16" (when corner pad is present).

No corner pad? No prob.

The Z-AC Z-End Base (3) provides basic protection from water infiltration by (a) blocking the path of the weatherstrip and (b) providing basic sealing of up to 1/2" above the cap. Endura recommends using Simple Solution® Corner Pads, but rest assured, a door with Z-AC will retain a basic seal without them.

Outperforms all other sills.

Don't just take our word for it. Z-AC has been extensively tested and proven to outperform every other sill on the market. Even in real-world conditions where margins are wide and corner pads are missing, Z-AC performs better in protecting against air and water infiltration.

INNOVATION POWERED BY ENDURA.

Endura is built on innovation and a commitment to performance. Our products are problem solvers, born directly from insight we've learned from our customers about real-world challenges. We're always pushing ourselves to face an ever-present challenge: How can we make your door system work better?

Innovation protected under patents and patents pending in U.S. and Canada. See www.endurapatents.com.
